BLACK SHIELD Reconnaissance Missions

1 January - 31 March 1968

SUMMARY

Fifteen BLACK SHIELD high-altitude reconnaissance missions were alerted during the period from 1 January to 31 March 1968. Six of the 15 missions were flown, four over North Vietnam and two over North Korea. Eight missions were cancelled due to weather conditions, and approval for one Korean mission was not obtained. (Appendix I lists these missions and related events.)

BLACK SHIELD photography of North Vietnam through 31 March 1968 revealed no evidence of surface-to-surface ballistic missiles, equipment, or facilities. Mission BX6843 photographed two suspect surface-to-surface (cruise) missile sites near Thanh Hoa. One site was unoccupied, and the second contained a few small unidentified objects.

The BLACK SHIELD program provided initial baseline coverage of North Korea on missions BX6847 and BX6853, with readable coverage of 70 percent of the country. These two missions supplied current photography of North Korean industrial and transportation systems and updated the existing order of battle. The ability of the BLACK SHIELD program to react rapidly is demonstrated by photographs of the USS Pueblo at anchor in Wonsan Bay obtained on mission BX6847. This mission was flown on 26 January, three days after the USS Pueblo was seized and one day after approval was granted. (Appendix II is a listing of the COMIREX targets photographed over North Korea.)

The BLACK SHIELD program has continued to supply good coverage of North Vietnam, particularly order of battle information of fighter aircraft and surface-to-air missile defenses. The program has contributed substantially to bomb damage assessment of point targets and of the interdiction effort directed against North Vietnamese road, rail, and water transportation systems. BLACK SHIELD missions have identified new targets and provided information [redacted]

[redacted] The tri-border area of South Vietnam, Laos, and Cambodia has also been covered well by BLACK SHIELD photography. BLACK SHIELD mission BX6856, flown over Khe Sanh and the border area of South Vietnam, provided strategic information of the hostile troop build-up, supply, and infiltration routes. (COMIREX targets photographed over North Vietnam are listed in Appendix III.)

All of the four North Vietnamese missions were tracked by [redacted] North Vietnamese air surveillance facilities. One unsuccessful surface-to-air missile (SAM) was launched at the vehicle of mission BX6842. The missile fired during the overflight was launched with the Fan Song radar in low PRF (first observed on missions BX6732 and BX6734). This was the first known instance of a Soviet SA-2 missile's having been guided by information derived from the Fan Song guidance radar operating in the low-PRF mode.

[redacted]
[redacted]
The initial evidence of EW tracking
by the North Koreans occurred on BX6853 when the Maryong-San radar station
[redacted]

MISSION ANALYSIS

BX6842

BLACK SHIELD mission BX6842 was a single-pass, high-altitude reconnaissance mission flown over North Vietnam on 4 January 1968. The BLACK SHIELD vehicle entered and exited North Vietnam at 0358:28Z and 0407:14Z. The mission vehicle encountered a SAM reaction at approximately 0405Z. Figure 1 shows the mission route and associated events.

There was no indication of surface-to-surface missile (SSM) activity in the photographed areas. The BLACK SHIELD vehicle photographed 176 [redacted] North Vietnamese COMIREX targets plus 16 bonus (non-COMIREX) targets.

Figure 1

~~TOP SECRET~~ TRINE OXCART
Handle via BYEMAN-COMINT Control Systems Jointly

Of the 176 COMIREX targets photographed, 139 were North Vietnamese SA-2 sites, 12 of which were occupied. The mission vehicle also photographed a number of probable cave defense sites near Hanoi and Haiphong.

The third [] signal qualified as a valid threat and activated the Mad Moth and Blue Dog BLACK SHIELD jammers. Correlation and analysis of all available data indicate that SAM site 267 (21°05'N, 105°44'E) launched a missile at the BLACK SHIELD vehicle at 0405:02Z. Figure 2 presents three photographs: one of smoke over site 267; a second of the launched missile, missile vapor trail and missile burn-out; and the third of missile detonation. Missile trajectory analysis from photography indicates the missile's approach to the mission vehicle was no closer than 8,000 feet and probably was much greater.

Figure 3. Signal & Vehicle Flight Environment

~~TOP SECRET~~ TRINE OXCART~~TOP SECRET~~ TRINE OXCART

Handle via BYEMAN-TALENT-KEYHOLE-COMINT Control Systems Jointly

90196 4-68 CIA

Strike/jamming activity during the overflight period was moderate and restricted to the Haiphong area.

BX6843

This BLACK SHIELD mission was a double-pass overflight of North Vietnam flown on 5 January 1968. The vehicle entered and exited North Vietnam at

Figure 4

~~TOP SECRET TRINE OXCART~~
Handle via BYEMAN-COMINT Control Systems Jointly

0412:56Z and 0425:56Z on its first pass, and at 0524:00Z and 0535:03 on its second pass. Figure 4 is a presentation of the flight route and associated events.

Two suspect SS (cruise) missile sites near Thanh Hoa were photographed, one containing a few small unidentified objects and the other unoccupied. The BLACK SHIELD vehicle photographed 233 [REDACTED] North Vietnamese COMIREX targets plus 10 bonus (non-COMIREX) targets. Of the 233 COMIREX targets photographed, 182 were North Vietnamese SA-2 sites. Fifteen of these sites were occupied. This mission also provided photography of five of North Vietnam's major airfields and coverage of almost all of the rail network.

[REDACTED]
None of these signals appeared to be tracking the mission vehicle, and no defensive system was activated. Initial EW tracking was accomplished by [REDACTED]

There was little or no strike/jamming during the overflight period.

BX6847

BLACK SHIELD mission BX6847 was a three-pass, high-altitude reconnaissance mission flown over North Korea on 26 January 1968. The mission vehicle was over the North Korean land mass on its first pass from 0217:53 to 0222:05, on the second pass from 0244:09 to 0248:36, and on the third pass from 0420:21 to 0425:07. Figure 5 presents the mission flight path and associated air surveillance events.

The BLACK SHIELD vehicle photographed 82 North Korean [REDACTED] COMIREX targets and 837 bonus targets. The mission obtained comprehensive baseline coverage of most of North Korea's armed forces and industry as well as large portions of the transportation system. The USS Pueblo and three new guided missile patrol boats (Komar PTG) were observed on photography of this mission. A BLACK SHIELD photograph of the USS Pueblo at anchor in a bay north of Wonsan is included in the examples of mission photography at the end of this report.

There was no indication of a hostile weapons reaction; no defensive system was activated during the overflight. [REDACTED]

**BX6851**

BLACK SHIELD mission BX6851 was a two-pass mission flown over North Vietnam on 16 February 1968. The vehicle entered North Vietnam on its first

Figure 6

pass at 0416:45 and exited at 0424:49. Overflight of the DMZ occurred from 0520:50 to 0521:46. Figure 6 is a plot of the mission route and associated tracking.

A rapid deterioration of weather over the target area resulted in little useable photography.

There was no indication of a hostile weapons reaction, and no electronic defensive equipment was activated during the overflight.

There was little or no strike/jamming activity during the overflight period.

BX6853

BLACK SHIELD mission BX6853 was a two-pass reconnaissance mission flown over North Korea on 19 February 1968. The mission vehicle penetrated and exited the North Korean land mass on its first pass at 0306:01 and 0309:50, and on its second pass at 0451:30 and 0456:51. Figure 7 is a plot indicating the mission route and related events.

The BLACK SHIELD vehicle photographed 84 North Korean COMIREX targets plus 89 bonus targets. Scattered clouds covered 20 percent of the area photographed, concealing the area in which the USS Pueblo was photographed on mission BX6847. One new, occupied SA-2 site was identified near Wonsan.

Figure 7

BX6856

This BLACK SHIELD two-pass mission was flown over North Vietnam and the Demilitarized Zone on 8 March 1968. The mission vehicle entered North Vietnamese airspace on its first pass at 0415:14Z and exited at 0428:01Z. On the second pass it overflowed the DMZ area in the time period from 0526:14Z to 0527:10Z. Figure 8 is a presentation of the flight route and associated tracking.

Good quality photography was obtained of Khe Sanh and the Laos, Cambodia, and South Vietnamese border areas. No useable photography was obtained of North Vietnam due to adverse weather conditions.

There was no indication of a hostile weapons reaction, and no on-board defensive systems were activated.

Figure 8

Little or no strike/jamming activity was conducted during the overingnt period.

Target

As a result, the first step in the process of creating a new model of the system of higher education is to identify the main problems of the existing system. The main problem of the existing system is the lack of a clear definition of the mission of the system of higher education. This lack of clarity has led to a lack of accountability and a lack of transparency in the system. The system is also characterized by a lack of innovation and a lack of relevance to the needs of society. The system is also characterized by a lack of accountability and a lack of transparency in the system. The system is also characterized by a lack of innovation and a lack of relevance to the needs of society.
