National Investigations Committee on Aerial Phenomena (NICAP)

Appears to be a fairly loose structurebut rather efficient. Stuart Nixon (background in investigative journalism) is currently Executive Director. He slong with John Acuff and Charles Miller (backgrounds unknown) make up the organizations Editorial Review Board which is responsible for policy including the newsletter, put press and other media relations as well as special reports and as programs.

This board reise relies heavily on both a loosely wix structured advisory group and a fairly well developed and well placed my network of investigators. The advisory group is nade up of experts in mix many disciplines including physics, astronomy, anthropology, medicine and psychology. This group also includes some ex-CIA and Defense Intelligence types who advise on investigative techniques and NICAP Government relations. There does not seem to be any logical or systematic program by which these advisors are chosen, but rather Ex the procedure seems to be to simply offer one's services to the organization through either Nixon or the Review Board. Often the advisors is simply joined NICAP(a rather easy task since all it takes is a specified membership max fee) found something out about the organization and then made their qualifications known to the Review Board.

The mit system of investigators is a good one. Nixon has divided the country into regions and has established "investigators" in each of the regions. Any memory of NICAP is encouraged to maintime requirements for the position mmemory for this position. The requirements for the position mmemory include a minimum age of 25, formal training or experience in some branch of science, or other specialized background applic able to systematic collection of information, the ability to cover an area of at least 50 miles in diameter mit or or hour of driving time. As of a few months ago some 35 investigators were located throughout the country, with NICAP in the process of establishing even more. A breakdown of their backgrounds looked like the following: 7 PhDs, 2MAS or MS, 23 BASPr PS, IAA and 241th college training but no degrees. Occupationally they included 4 physical scientists, 13 engineers, 3 college profs, 13 specialists, including doctor, technician, computer programmer and businessman. "ive of the 35 are pilots. Also maximum utilized as " legmen" for the investigators are investig tor maximum and the investigators for NICAP.

Approved for Release

C00015455

NICAP currently operates on a \$40,000 yr. budget and has 3,500 dues paying members. Both the membership and the budget may be expected to increase unbatanitix substatially due to the recent UFO flap.

A computer project codenamed "Project Access" is currently in the mill. "n effort is being made to develop some sort of pattern analysis out of the 15, 000 or more raw reports reportedly in NICAP's files. This apparently will take the following form:

> 1. event- including time, place, terrain, weather speed, color, fx shape and other information

1

- 2. principals-including data on all witnesses and others involved in reports such as blo data, medical info and osychological aspects
- 3. investigation- including evaluation of reports and special notes from the regional investigator on witness discrepancy in testiony etc...

The following is apparently the xm organizational structure and Pelationships within NICAP:
