in the southern part of the PRC. No solution has been developed to control this disease although a high priority has been assigned to the effort.

5. Dr. Hatem reluctantly discussed a few aspects of political life in the PRC. He stated that Communism has not been achieved as yet but steady progress is being made toward that goal. His salary is higher than his son's because the stage of society is now such that each receives according to his ability, not according to his needs. The Cultural Revolution served as a purification of the ranks so now the majority of the masses share the same goal of achieving full Communism. The Cultural Revolution also provided a continuity to the system that was lacking before, and this will not be altered with the death of Mao or Chou.
