Subject: New cafeteria layout
Feedback: Two weeks after the reopening of the food service area at Hqs, why is the breakfast line still chaotic? The traffic pattern makes no sense: one walks in to get bagels/etc, turns around against inflowing traffic to get to the toaster, then goes back into the flow to get spreads. The pick-up area for the bagels lacks containers (those are by the toasters), and the spreads are in tiny, unlabeled tubs with no spreading implements (are we to use our fingers?). No management was in sight the morning of 7.

[Redacted] Where is the COTR monitoring this contract?
