7 October 1950

MEMORANDUM FOR: FILES

SUBJECT: Development of SGPSALM

1. This branch is developing an operational relationship with SGPSALM through the FJROWDY Contacts Group of Cleveland O. Hahn.
2. Preliminary conversations have been held with Hahn, and project ZRLYNCH has been developed to exploit his group. An operational clearance on Hahn is now pending.
3. The following results are desired from this operational lead:
 - a. The establishment of an operational relationship between ourselves and Hahn.
 - b. The re-establishment of some contact between Hahn's group and the interior of HBCLLOUD.
 - c. The careful planning for the operational penetration of HBCLLOUD.
 - d. The final implementation of specific operations inside HBCLLOUD must necessarily wait for the re-establishment of some contact. In all cases the type of activity will be judged in terms of world events, risks, etc. A primary factor will be the development of facilities that will be needed in time of war or when democratic goals in the QKCOAST area are nearer realization i.e. escape and evasion nets, sabotage of TPSTALL line of communications and supported guerrilla warfare.
4. This branch has invited OGIVE to participate in this operational development. Whether or not they participate, OGIVE has been asked to support the operation by furnishing CI protection and furnishing this branch with the operational data and intelligence necessary for operations. This branch intends to coordinate many aspects with FDS/OSO since the latter has been in the field a much longer time. It is imperative that both offices do their utmost to avoid crossing wires, or to avoid giving anyone the opportunity of exploiting the separation of functions. It goes without saying that Ogive will receive any intelligence information resulting from this relationship.
