

Esp research has its dangers

1. The personality of the Psychic often becomes unbalanced. This is difficult
2. The telekinetic phenomena associated with Esp can be destructive of equipment especially electronic equipment
3. ~~There is a~~ ^{the} security breach of a Chevrojoint. ~~Compulsions do not keep him~~ out if he wants to make them
4. Esp development rarely stops at merely ESP. The people involved usually want a short cut to greater power. To get this power they slip into either the occult or religion (many of these people are attacked Psychic susceptibility). Occultism leads to personality degeneration and destructive behavior. Even the so-called Golden Dawn society ended up as the province of Aleister Crowley, its last president and a confirmed Satanist.

It is interesting to note that Hitler felt
 it necessary to use psychic help to enhance
 his power. He was a member of the occult
 Thule Society. The Society of Hitler as you
 are well aware degenerated into an advanced
 form of Social cannibalism. His violent
 murderous behavior is the predictable outcome
 of professed occultism. Whether we speak
 of the witch trials of Salem, the innocent
 sacrifice on the Helbrim and we find the
 same murderous outcome with the innocent
 being particular targets. Such a force
 must not be allowed to become a major
 part of U.S. power consideration if we
 want to remain as a decent people.
