MEMORANDUM FOR THE RECORD

SUBJECT: Parapsychology, The SIGINT/COMSEC Threat

1. ~~(TS-CCO)~~ Remote Viewing:

Laboratory demonstrations have shown that gifted individuals using remote viewing can describe small details in a room or describe a SIGINT site and particular types of antennae. These capabilities threaten to:

1. Uncover covert sites and their targeting capability.
2. Collect individual types of written or printed SIGINT information.
3. Uncover personnel identities and behavior in covert or supporting third party SIGINT operations.
4. Determine EAM message and PAL coded information.

2. ~~(TS-CCO)~~ Telekinesis:

Laboratory demonstrations have shown that gifted individuals using telekinetic abilities can alter the state of objects or change electrical or magnetic fields. These capabilities threaten to:

1. Cause malfunctions in critical ADP circuits.
 2. Cause communications equipment to malfunction.
 3. Prevent automatic electronic keyers to malfunction.
3. ~~(S)~~ There are a number of other parapsychological threats, including those to personnel, which cannot be described in this paper.
