| | Top Secret 5 DECŁMBŁR 1977 |
|--------|---|
| | 3 DECEMBER 1977 |
| | |
| STATUS | UF SUVIET RURSAT |
| | |
| | As of 28 November, there has been no significant change in the status of Cosmos 954, a radar ocean |
| | reconnaissance satellite (ROKSAI) |
| | |
| | |
| | |
| | |
| | As previous RURSATs |
| | terminated their missions, a portion of the venicle (which we believe contains the nuclear reactor) was |
| | boosted from an altitude of about 140 nm to about 500 |
| | nm. This prevents the nuclear materials from reentering the atmosphere for over 500 years, well in |
| | excess of the half life of the estimated nuclear power |
| | supply. We believe that the KORSAT has a failsafe mechanism designed to start the sequence to boost the |
| | power supply into a higher orbit when certain criteria are met. |
| | are met. |
