Subject: update on dd meeting

(b)(6)

Hi Didi,

Hope you are enjoying the weekend. (I'm locked up with chapters.)

Any update on the meeting with Mike Morell? I'm trying to plot out travel for the week, so it would help to know as soon as his schedule is firm.

And a quick confirmation on something Director Petraeus said: When talking about the RQ 170 that went down, he made reference to the fact that the speed sensor was out of whack (which everyone agrees on) but then said something about how it showed the plane was moving at 15,000 mph. I couldn't tell, going back over my notes, whether he meant it really showed that, or simply that was an exaggeration to make a point.

We should go over the on-record/off stuff soonest, because pages are on their way.

cheers,
David

many thanks,
David
