

STOP ROCKEFELLER'S NAZI DOCTORS

We possess unimpeachable evidence that the US Central Intelligence Agency (CIA) is carrying out a worldwide operation for the subversion and military takeover of the United States and Europe. The CIA's Operation "Orpheus" involves widescale torture, brainwashing and assassination with an immediate coup in Britain and an approximate 1974 takeover of the USA on the agenda.

Hard evidence of this plot has been developed in the "deprogramming" of Christopher White, a leading member of the European Labor Committees, who was tortured and brainwashed by the CIA and the British government in London. White was sent by the CIA to the U.S. in December, on programmed, assassination and other missions against the National Caucus of Labor Committees, to join with at least 3 other victims of sadistic CIA torture and brainwashing already in the U.S.

The attack against the Labor Committees was a mere pawn in a much wider operation--but the pawn bit!

We have proof of vast, inhuman, illegal CIA operations of brainwashing and torture under the cover of "behavior modification" being carried out in prison, college campuses, hospitals and elsewhere throughout the US and worldwide. The CIA is securing for employers a docile, Zombie-like labor force, a population willing to accept a fascist police regime without a fight.

The funding of CIA torture and brainwashing is accomplished through the Law Enforcement Assistance Agency (LEAA) and other CIA front groups. The LEAA is also coordinating a systematic takeover of local police departments across the country, and has concrete plans for a military coup in this country.

The CIA's brainwashing repertoire includes every device known to Hitler's "medical science," plus many "advances" and programs on a scale Hitler never dared.

Psychosurgery, chemotherapy, hypnosis, electroshock and other tortures under the rubric of "aversion therapy" are being carried out on a vast and horrible scale in the US. These practices are developed with the aid of quack fascist psychology departments on college campuses, where the psychology of the rat is explicitly equated with the mind of man. They have nothing whatsoever in common with science.

These brainwashing operations and all such "behavior modification" practices constitute crimes against humanity under the Nuremburg Laws.

We are going to end brainwashing in the United States and Europe.

We are going to close all behavioral psychology departments on college campuses

Those responsible for tortures and brainwashing are going to be tried and dealt with as at Nuremburg.

ORGANIZING MEETINGS:

- WED., 1/23, NOON** - Operation Nuremburg and Operation Mop-Up Woodcock.
James Burnett, spokesman-candidate for office
of UAW Local 1173, Chevy Tonawanda
- SAT., 1/26, 4 PM** - Spokesmen-James Burnett, and a supporter of the
Commission of Inquiry

The future of the human race is at stake.

We are launching this morning our own "Operation Nuremburg", to expose and begin the destruction of CIA brainwashing and behavior modification in the United States.

We have chosen three centers of CIA operations as our first target in this campaign: the activities of one, Nathan S. Kline, operating out of Columbia University in New York; the Boston, Massachusetts CIA brainwashing operatives centered in Harvard University and Massachusetts General Hospital; and the CIA axis in Temple University in Philadelphia. Summary details in these criminal operations are given below. The criminals involved must be brought to justice. These operations must be shut down.

We are drawing the line: humanity or the destruction of humanity.

You must choose.

TARGETS OF OPERATION NUREMBURG

*Nathan S. Kline - one of the CIA's highest medical scientists. His assignment at the College of Physicians and Surgeons, Columbia Presbyterian Hospital, and possibly at Cornell University, is to train brainwashing operatives for thought control projects throughout the world.

For more than two decades a follower and close associate to CIA founder Dr. John Rees, Kline has participated in various CIA counterinsurgency operations in Liberia, Nepal, Tanzania, Pakistan, Sarawak, Jamaica, Kuwait, Israel, Yugoslavia and the USSR.

Kline is the president of the International Committee Against Mental Illness-ICAMI. Funded by the federal drug companies and the federal National Institute of Mental Health (NIMH), ICAMI runs the only psychiatric clinics in Iran and Indonesia, dispensing anti-depressant drugs to the natives "for the duration of their lives". ICAMI is now establishing "treatment" facilities in Columbia, Ethiopia, Haiti, Nigeria, Pakistan, Peru and the Sudan.

In 1959, dictator Papa Doc Duvalier awarded Kline Haiti's highest civilian medal for brainwashing Haitians with drugs and voodoo. Kline openly remarked on the lack of witch doctors in the U.S.

ICAMI organizes politically for the use of drugged, mentally ill persons as slave laborers in industry.

*V. Mark, *William H. Sweet, *Frank Ervin- co-authors of a 1967 AMA journal letter saying that anyone who participated in the Detroit ghetto riot suffered from some combination of brain damage, genetic disorder or hormone trouble, and should have had the appropriate parts of his brain cut out. In 1970 they formed a paper organization, the Neuro-Research Center. They were funded by the LEAA and the NIMH through intervention of Sweet's personal friend Elliot Richardson. The purpose of the funding was experimentation on prison inmates to determine the role of brain damage in criminal behavior. Mark is now a consulting neurosurgeon for the Air Force, head of Neurosurgery at Boston City College, on call at Massachusetts Penal, and lecturer at Harvard.---Sweet is now chief neurosurgeon at Mass. General Hospital and is also at Harvard Medical School.---Ervin has gone semi-underground at U.C.L.A. in California after his state-funded "Center for the Prevention of Violence" failed to get off the ground in 1971 due to public protest. From 1964 to 1972 he was director at a lab for Psychological Research at Mass. General.

*B.F. Skinner-leading light of fascist behaviorism in the U.S. In 1953 he began work at Harvard with a Navy grant to develop the clinical side of behaviorism. Skinner is the CIA's most celebrated research and development man.

*Joseph Wolpe- brainwashing specialist in "Aversion Behavior Modification", now at Temple University. Wolpe uses hypnosis, electric shock, drug induced nausea - and for the purpose of acute terror - a drug which stops the victim's breathing and makes him think death is at hand. Wolpe trains foreign students in behavior modification. An internationally known Pavlovian, he also intends to help launch a massive behavior mod. expansion at the University of Pennsylvania.

Other targets include: *Elliot M. Slater, Boston, *H. Thomas Ballantine, Boston, *Edgar H. Schein, MIT/CIA Center for International Studies, *Arnold A. Lazarus, Philadelphia, *Henry T. Wycis, Philadelphia. (see Solidarity, Vol. IV No. 39, Jan. 18, 1974).
