Sweden - Urban Growth Rate v. Total Population Growth Rate

The graph shows the comparison between the urban growth rate and the total population growth rate in Sweden from 2000-2005 to 2025-2030. The blue line represents the urban growth rate, while the orange line represents the total population growth rate. Over the time periods, the urban growth rate generally increases, peaking around 2010-2015, and then decreases, whereas the total population growth rate shows a less pronounced trend, with a slight increase followed by a decrease.
