Czechia - Urban Growth Rate v. Total Population Growth Rate

The chart shows the comparison between Urban Growth Rate and Total Population Growth Rate for Czechia over six time periods: 2000-2005, 2005-2010, 2010-2015, 2015-2020, 2020-2025, and 2025-2030. The urban growth rate is represented by a blue line, while the total population growth rate is represented by an orange line. The y-axis represents the percent change, and the x-axis represents the time periods.

Key observations:
- The urban growth rate peaked in 2005-2010, whereas the total population growth rate peaked in 2000-2005.
- The urban growth rate has since declined, with a more gradual decrease compared to the total population growth rate.
- The total population growth rate has also shown a decline, particularly after 2010-2015.
